CONTENTS

Volume 38

Number 1, February 1992

F. J. C. Odibo, N. Okafor, and B. U. Okafor: Purification and immobilization of *Scytalidium* sp. α-amylase and its general properties 1

Y. Matsuno, T. Hitomi, T. Ano, and M. Shoda: Transformation of *Bacillus subtilis*, antifungal-antibiotic iturin producers with isolated antibiotic resistance plasmids 13

M. A. Nadkarni, C. K. K. Nair, V. N. Pandey, and D. S. Pradhan: Characterization of alpha-galactosidase from *Corynebacterium murisepticum* and mechanism of its induction 23

K. Tokuoka, T. Ishitani, and Won-Chul Chung: Accumulation of polyols and sugars in some sugar-tolerant yeasts 35

I. Sagawa and Y. Nagata: Analysis of chromosomal DNA of mushrooms in genus *Pleurotus* by pulse-field gel electrophoresis 47

M. Ikeda, M. Wachi, and M. Matsuhashi: The *murG* gene of the *Escherichia coli* chromosome encoding UDP-*N*-acetylglucosamine: undecaprenyl-pyrophosphoryl-*N*-acetylmuramoly-pentapeptide *N*-acetylglucosaminyl transferase 53

H. Hagiya, T. Oka, H. Tsuji, and K. Takumi: The S layer composed of two different protein subunits from *Clostridium difficile* GAI 1152: a simple purification method and characterization 63

Short Communication

S. Virk, B. N. Johri, and S. P. Singh: Protoplast from *Malbranchea pulchella* var. *sulfurea*: isolation and regeneration 75

M. Hamamoto, K. Uchida, and H. Yamaguchi: Ubiquinone system and DNA base composition of strains in the genus *Malassezia* determined by high-performance liquid chromatography 79

T. Sugita, A. Nishikawa, and T. Shinoda: DNA relatedness among the three varieties of *Cryptococcus albidus* 83

H. X. Chiura, K. Hirota, and J. Takagi: Eubacterial strains sensitive to aphidicolin are discovered among marine bacteria 87

Number 2, April 1992

K. Hamana and S. Matsuzaki: Taxonomic significance of polyamine synthesis in *Paracoccus* 93

Y. Nakagaito, A. Yokota, and T. Hasegawa: Three new species of the genus *Streptomyces*: *Streptomyces cochleatus* sp. nov., *Streptomyces paracochleatus* sp. nov., and *Streptomyces azaticus* sp. nov. 105

S. Tanasupawat, T. Ezaki, K. Suzuki, S. Okada, K. Komagata, and M. Kozaki: Characterization and identification of *Lactobacillus pentosus* and *Lactobacillus plantarum* strains from fermented foods in Thailand 121

A. Ando, K. Noguchi, M. Yanagi, H. Shinoyama, Y. Kagawa, H. Hirata, M. Yabuki, and T. Fujii: Primary structure of chitosanase produced by *Bacillus circulans* MH-K1 135

K. Tokuoka, H. Ishizuka, K. Wako, and H. Taniguchi: Comparison of three forms of erythrose reductase from an *Aureobasidium* sp. mutant 145

Y. Okada, M. Wachi, K. Nagai, and M. Matsuhashi: Change of the quantity of penicillin-binding proteins and other cytoplasmic and membrane proteins by mutations of the cell shape-

Volume 38

Number 1, February 1992

F. J. C. Odibo, N. Okafor, and B. U. Okafor: Purification and immobilization of *Scytalidium* sp. α-amylase and its general properties 1

Y. Matsuno, T. Hitomi, T. Ano, and M. Shoda: Transformation of *Bacillus subtilis*, antifungal-antibiotic iturin producers with isolated antibiotic resistance plasmids 13

M. A. Nadkarni, C. K. K. Nair, V. N. Pandey, and D. S. Pradhan: Characterization of alpha-galactosidase from *Corynebacterium murisepticum* and mechanism of its induction 23

K. Tokuoka, T. Ishitani, and Won-Chul Chung: Accumulation of polyols and sugars in some sugar-tolerant yeasts 35

I. Sagawa and Y. Nagata: Analysis of chromosomal DNA of mushrooms in genus *Pleurotus* by pulse-field gel electrophoresis 47

M. Ikeda, M. Wachi, and M. Matsuhashi: The *murG* gene of the *Escherichia coli* chromosome encoding UDP-*N*-acetylglucosamine: undecaprenyl-pyrophosphoryl-*N*-acetylmuramoly-pentapeptide *N*-acetylglucosaminyl transferase 53

H. Hagiya, T. Oka, H. Tsuji, and K. Takumi: The S layer composed of two different protein subunits from *Clostridium difficile* GAI 1152: a simple purification method and characterization 63

Short Communication

S. Virk, B. N. Johri, and S. P. Singh: Protoplast from *Malbranchea pulchella* var. *sulfurea*: isolation and regeneration 75

M. Hamamoto, K. Uchida, and H. Yamaguchi: Ubiquinone system and DNA base composition of strains in the genus *Malassezia* determined by high-performance liquid chromatography 79

T. Sugita, A. Nishikawa, and T. Shinoda: DNA relatedness among the three varieties of *Cryptococcus albidus* 83

H. X. Chiura, K. Hirota, and J. Takagi: Eubacterial strains sensitive to aphidicolin are discovered among marine bacteria 87

Number 2, April 1992

K. Hamana and S. Matsuzaki: Taxonomic significance of polyamine synthesis in *Paracoccus* 93

Y. Nakagaito, A. Yokota, and T. Hasegawa: Three new species of the genus *Streptomyces*: *Streptomyces cochleatus* sp. nov., *Streptomyces paracochleatus* sp. nov., and *Streptomyces azaticus* sp. nov. 105

S. Tanasupawat, T. Ezaki, K. Suzuki, S. Okada, K. Komagata, and M. Kozaki: Characterization and identification of *Lactobacillus pentosus* and *Lactobacillus plantarum* strains from fermented foods in Thailand 121

A. Ando, K. Noguchi, M. Yanagi, H. Shinoyama, Y. Kagawa, H. Hirata, M. Yabuki, and T. Fujii: Primary structure of chitosanase produced by *Bacillus circulans* MH-K1 135

K. Tokuoka, H. Ishizuka, K. Wako, and H. Taniguchi: Comparison of three forms of erythrose reductase from an *Aureobasidium* sp. mutant 145

Y. Okada, M. Wachi, K. Nagai, and M. Matsuhashi: Change of the quantity of penicillin-binding proteins and other cytoplasmic and membrane proteins by mutations of the cell shape-

determination genes *mreB*, *mreC*, and *mreD* of *Escherichia coli* 157
H. Morisaki, Y. Kasahara, S. Tanigawa, and T. Hattori: The changes in the surface characteristics of *Pseudomonas syringae* induced by a plasmid 165

Short Communication

Y. Yamada, K. Maeda, T. Nagahama, I. Banno, and M.-A. Lachance: The phylogenetic relationships of the genus *Sporopachydermia* Rodrigues de Miranda (Saccharomycetaceae) based on the partial sequences of 18S and 26S ribosomal RNAs 179
A. R. Gautam, S. P. Pathak, P. W. Ramteke, and J. W. Bhattacharjee: Virulence factors in environmental isolates of aeromonas spp. 185
K. Hamana and S. Matsuzaki: Diaminopropane occurs ubiquitously in *Acinetobacter* as the major polyamine 191

Number 3, June 1992

K. Ueki, A. Ueki, K. Takahashi, and M. Iwatsu: The role of sulfate reduction in methanogenic digestion of municipal sewage sludge 195
R. Margesin and F. Schinner: A comparison of extracellular proteases from three psychrotrophic strains of *Pseudomonas fluorescens* 209
A. Singh, P. K. R. Kumar, and K. Schugerl: Direct fermentation of cellulosic materials by *Fusarium oxysporum* 841: acetic acid/ethanol production and tolerance 227
Y. Nakamura, N. Mikami, R. Kikuchi, and M. Matsuo: A DNA probe suitable for monitoring genetically engineered microorganisms in the environment 237
Y. Yamada, K. Maeda, and I. Banno: The phylogenetic relationships of the Q_9-equipped, spheroidal ascospore-forming *Pichia* species based on the partial sequences of 18S and 26S ribosomal RNAs 247
S. P. Pathak, A. R. Gautam, N. Garg, and J. W. Bhattacharjee: Ecology and toxigenicity of *Vibrio cholerae* NON-O1 isolated from tropical river water 253
D. Kumar, J. B. Singh, and H. D. Kumar: Effects of low temperature on two cyanobacteria .. 263
T. Araya, N. Ishibashi, and S. Shimamura: Genetic evidence that *Lactococcus lactis* JCM 7638 produces a mutated form of nisin 271

Short Communication

O. Garcia, Jr., J. K. Mukai, and C. B. Andrade: Growth of *Thiobacillus ferrooxidans* on solid medium: effects of some surface-active agents on colony formation 279
T. K. Dutta and T. B. Samanta: An improved method for separation and estimation of bioconverted steroids 283
Y. Katayose, Y. Yui, S. Kajiwara, and K. Shishido: A wide distribution of linear DNA plasmids in the *Basidiomycetes lentinus edodes* and *Pleurotus ostreatus* 289

Number 4, August 1992

F. Jin, X. Li, C. Zhang, Q. Shu, H. Wu, Z. Liu, X. Zhang, X. Wu, and Y. Cheng: Purification and characterization of a thermostable α-amylase from *Bacillus* sp-JF strain 293
P. K. Lai, T. Oh-hara, Y. Tamura, Y. Kawazoe, K. Konno, H. Sakagami, A. Tanaka, and M. Nonoyama: Polymeric phenylpropenoids are the active components in the pine cone extract that inhibit the replication of type-1 human immunodeficiency virus in vitro 303
T. Török, C. Royer, D. Rockhold, and A. D. King, Jr.: Electrophoretic karyotyping of yeasts, and southern blotting using whole chromosomes as templates for the probe preparation 313
S. Tachiwana, S. Higashi, T. Uchiumi, and M. Abe: The effect of *Rhizobium leguminosarum* bv. *trifolii* nodulation genes in *Rhizobium fredii* USDA 193 327

T. Araki, Y. Tamaru, and T. Morishita: β-1,4-Mannanases from marine bacteria, *Vibrio* spp. MA-129 and MA-138 343
T. Hase, M. Watanabe, H. Yasukawa, and Y. Masamune: In vitro DNA replication of plasmid pKYM 353
M. Vancanneyt, R. Coopman, R. Tytgat, J.-F. Berny, G. L. Hennebert, and K. Kersters: A taxonomic study of the basidiomycetous yeast genera *Rhodosporidium* banno and *Rhodotorula* harrison based on whole-cell protein patterns, DNA base compositions and coenzyme Q types 363

Short Communication

T. Murakami, S. Ishii, N. Komiyama, and K. Shishido: Synthesis of the *N*-terminal half of the tetracycline resistance protein of pBR322 is responsible for a high level of plasmid DNA supercoiling in *Escherichia coli* 379
T. Ishii and M. Ohba: Immunological relationships between parasporal inclusions of *Bacillus thuringiensis* serovar *kyushuensis* and the three other mosquito-specific *Bacillus thuringiensis* strains 385

Number 5, October 1992

R. Rai: Effect of acidity factors on aspects of symbiotic N_2 fixation of *Lens culinaris* in acid soils 391
S. Sarkar, K. D. Pandey, and A. K. Kashyap: Simultaneous photoproduction of hydrogen and ammonia by a non-heterocystous cyanobacterium *Plectonema boryanum* 407
N. C. Mandal and P. K. Chakrabartty: Regulation of enzymes of glyoxylate pathway in root-nodule bacteria 417
Z. Zakaria, C. N. A. Razak, K. Ampon, M. Basri, W. M. Z. Yunus, Y. Shirai, A. B. Salleh, and K. Hashimoto: Optimum conditions for the production of lipase by alginate-immobilized bacteria 429
T. Shiba: Effects of 5-aminolevulinate and *N*-methylprotoporphyrin dimethyl ester on bacteriochlorophyll synthesis in aerobic bacteria 439
H. Minato, M. Otsuka, S. Shirasaka, H. Itabashi, and M. Mitsumori: Colonization of microorganisms in the rumen of young calves 447
L. Segueilha, H. Boze, M. L. Claisse, G. Moulin, and P. Galzy: Alternative respiratory pathways in *Schwanniomyces castellii*: involvement in energy production and growth 457
M. Takeuchi and A. Yokota: Proposals of *Sphingobacterium faecium* sp. nov., *Sphingobacterium piscium* sp. nov., *Sphingobacterium heparinum* comb. nov., *Sphingobacterium thalpophilum* comb. nov. and two genospecies of the genus *Sphingobacterium*, and synonymy of *Flavobacterium yabuuchiae* and *Sphingobacterium spiritivorum* 465
K. Tsuyuki, T. Sugitani, Y. Miyata, T. Ebashi, and Y. Nakajima: Isolation and characterization of isomaltulose- and trehalulose-producing bacteria from Thailand soil 483

Short Communication

A. Casadevall and M. Fan: *URA5* gene of *Cryptococcus neoformans* var. *gattii*; evidence for a close phylogenetic relationship between *C. neoformans* var. *gattii* and *C. neoformans* var. *neoformans* 491
K. Katayama-Hirayama, S. Tobita, and K. Hirayama: Detection of β-ketoadipic acid in the phenol degradation using whole cells of *Rhodotorula rubra* 497
F. Yanagida, F. Ichinose, T. Shinohara, and S. Goto: Distribution of wild yeasts in the white grape varieties at Central Japan 501
Y. Matsuno, T. Ano, and M. Shoda: Cloning of a gene responsible for the specific production of an antifungal antibiotic iturin with *n*-C_{16}-β-amino acid residue 505

Number 6, December 1992

S. P. Singh and P. J. Rogers: Regulation of glycolytic flux in *Brochothrix thermosphacta* by the cytoplasmic pH and adenylate charge: an in vivo NMR study 511

R. Li and I. C. Mac Rae: Isolation and identification of N_2-fixing enterobacteria associated with sugarcane in tropical Australia 523

M. A. Nadkarni, C. K. K. Nair, V. N. Pandey, and D. S. Pradhan: Raffinose metabolism and a novel mode of sucrose synthesis in *Corynebacterium murisepticum* 533

H. Kawasaki, Y. Hoshino, H. Kuraishi, and K. Yamasato: *Rhodocista centenaria* gen. nov., sp. nov., a cyst-forming anoxygenic photosynthetic bacterium and its phylogenetic position in the *Proteobacteria* alpha group 541

E. W. J. van Niel, L. A. Robertson, R. P. Cox, and J. G. Kuenen: Inhibition of denitrification and oxygen utilization by *Thiosphaera pantotropha* 553

Y. Yamada and Y. Nakagawa: The phylogenetic relationships of some heterobasidiomycetous yeast species based on the partial sequences of 18S and 26S ribosomal RNAs 559

K. Miyazaki, T. Hino, and H. Itabashi: Effects of extracellular pH on the intracellular pH and membrane potential of cellulolytic ruminal bacteria, *Ruminococcus albus*, *Ruminococcus flavefaciens*, and *Fibrobacter succinogenes* 567

K. Hamana, H. Hamana, M. Niitsu, K. Samejima, and S. Matsuzaki: Distribution of unusual long and branched polyamines in thermophilic eubacteria belonging to "*Rhodothermus*," *Thermus* and *Thermonema* 575

Y. Yamada, K. Maeda, and I. Banno: The phylogenetic relationships of the Q_6-equipped species in the teleomorphic apiculate yeast genera *Hanseniaspora*, *Nadsonia*, and *Saccharomycodes* based on the partial sequences of 18S and 26S ribosomal ribonucleic acids 585

I. Sagawa, M. Tanaka, and Y. Nagata: Discrimination of mushrooms in genus *Pleurotus* by DNA restriction fragment length polymorphism 597

K. Garg and C. B. Sharma: Continuous production of citric acid by immobilized whole cells of *Aspergillus niger* 605

Short Communication

N. Khurana, R. Gupta, R. C. Kuhad, and R. K. Saxena: Effect of protein synthesis and respiratory inhibitors on microcycle conidiation of *Aspergillus tamarii* 617

Y. Yamada, K. Maeda, I. Banno, and J. P. van der Walt: An emendation of the genus *Debaryomyces* Lodder et Kreger-van Rij and the proposals of two new combinations, *Debaryomyces carsonii* and *Debaryomyces etchellsii* (saccharomycetaceae) 623

Y. Nakagaito, A. Shimazu, A. Yokota, and T. Hasegawa: Proposal of *Streptomyces atroaurantiacus* sp. nov. and *Streptomyces kifunensis* sp. nov. and transferring *Kitasatosporia cystarginea* Kusakabe and Isono to the genus *Streptomyces* as *Streptomyces cystargineus* comb. nov. 627

H. Hiraoka, O. Asaka, T. Ano, and M. Shoda: Characterization of *Bacillus subtilis* RB14, coproducer of peptide antibiotics iturin A and surfactin 635

V. Savalgi and V. Savalgi: Alginate production by *Azotobacter vinelandii* in batch culture 641
